PROFESSIONAL SUMMARY

Motivated Information Technology undergraduate at SLIIT with hands-on experience in Python, SQL, and data manipulation using Pandas and NumPy. Skilled at building end-to-end data workflows—ingestion, cleaning, transformation, and analysis—through machine learning and full-stack projects. Comfortable with relational databases (MySQL), data validation, and preparing structured datasets for analytics and visualization. Eager to contribute to building reliable data pipelines and Power BI-ready datasets at Ceylon Cold Stores PLC, while learning best practices in data engineering, cloud platforms (Azure, Databricks), and data governance.

TECHNICAL SKILLS

Programming	Python (Pandas, NumPy, Scikit-learn, PyTorch), SQL, Java, JavaScript
Databases	MySQL, Relational data modeling, Joins, Aggregations, Data transformations
Data & Analytics	Data ingestion, ETL workflows, Data cleaning & validation, Exploratory Data Analysis, KPI tracking
BI & Visualization	Power BI (familiar), Matplotlib, Seaborn
Cloud & Big Data	Microsoft Azure (learning), Databricks (learning), Git/GitHub
Web & Tools	React, Spring Boot, REST APIs, VS Code, Jupyter
Soft Skills	Analytical thinking, Problem-solving, Teamwork, Communication, Adaptability

PROJECTS

End-to-End ML Pipeline for Mental Health Prediction

Tech Stack: *Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn*

- Designed an ingestion-to-insight workflow that loaded survey data, validated record-level consistency, and handled missing values, duplicates and categorical encoding.
- Engineered features and applied multiple transformations (scaling, encoding, imputation) to prepare clean analytics-ready datasets.
- Trained, evaluated and compared classification models, documenting accuracy, precision and recall to support data-driven decisions.

Time-Series Data Pipeline – Stock Price Prediction (LSTM)

Tech Stack: *Python, PyTorch, Pandas, NumPy, yFinance, Scikit-learn, Matplotlib*

- Built an automated ingestion pipeline using the yFinance API to pull historical market data and store it in structured tabular form.
- Implemented data validation and transformation steps (resampling, normalization, sequence windowing) to produce model-ready datasets.
- Developed an LSTM model and visualized predicted vs. actual trends, mirroring a raw-to-analytics layer architecture.

Cryptocurrency Market Analytics & Prediction

Tech Stack: *Python, Pandas, NumPy, Scikit-learn, yFinance, Matplotlib*

- Collected and consolidated multi-asset historical data, performing data quality checks across raw and cleaned layers.
- Performed exploratory data analysis with aggregations, joins and trend visualizations to surface key indicators (similar to KPI dashboards).
- Delivered structured datasets and visual summaries that could be readily consumed by BI tools.

Web-Based Pharmacy Management System

Tech Stack: *Java, Spring Boot, React, MySQL*

- Designed a normalized MySQL schema for inventory, prescriptions and patient records; wrote SQL queries with joins, filters and aggregations.
- Built CRUD APIs and a React UI that interacted with the database, ensuring data accuracy and consistency across modules.
- Applied basic data governance principles—input validation, role-based access and auditable records.

EDUCATION

BSc (Hons) in Information Technology – Specializing in Data Science

Present

Sri Lanka Institute of Information Technology (SLIIT)

Relevant coursework: Database Management Systems, Data Structures & Algorithms, Programming, Statistics, Machine Learning fundamentals.

GCE Advanced Level – Physical Science Stream

Nov 2020 – Dec 2023

Taxila Central College

Mathematics (C), Physics (B), ICT (B), English (A).

Diploma in Information & Communication Technology

Aug 2020 – Nov 2020

ICBT Campus

Successfully completed.

GCE Ordinary Level

2015 – 2020

Taxila Central College

9 A passes.

COURSES & CERTIFICATIONS

- Data Science Job Simulation – British Airways (Forage): worked on data cleaning, customer review analysis, predictive modeling and presenting insights to stakeholders.
- Self-paced learning: SQL fundamentals, Python for data analysis, introductory Power BI, and Microsoft Azure data services.
- Ultimate AWS Certified AI Practitioner AIF-C01

LANGUAGES

English (Pearson Test of English – 77 / Proficient) · **Sinhala** (Native)

PERSONAL DETAILS

Date of Birth: 27 April 2004

Nationality: Sri Lankan

NIC: 200411804090

Address: 204 D/2, Thanayam Place, Ingiriya, 12440, Sri Lanka
