English

Summary

Ambitious Software Engineering student with a strong interest in Machine Learning and Data Science. Skilled in Python, SQL, Java, React, Spring Boot, and JavaScript, with experience in Pandas, NumPy, Scikit-learn, and PyTorch. Experienced in building analytical models and full-stack applications, with projects showcased on GitHub. Adaptable, driven, and committed to continuous learning and real-world problem solving.

Education

Information Technology, Sri Lanka Institute of Information Technology (SLIT)

Present

Present

Advanced Level(Physical Science), Taxila Central College

November 2020 - December 2023

- English - A
- Mathematics - C
- Physics - B
- ICT. - B

Diploma in ICT, ICBT

August 2020 - November 2020

Successfully completed

Ordinary Level, Taxila Central College

March 2015 - April 2020

Successfully completed with 9 A passes

Pearson Test of English (PTE) - 77

Courses

Data Science Job Simulation, British Airways

Projects

Machine Learning for Mental Health Prediction

Description: Built a model to predict mental health treatment needs using survey data with preprocessing and evaluation.

Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Web-based pharmacy management app

Description: Developed a web app to manage drug inventory, prescriptions, and patient records.

Technologies: Java, React, MySQL

Deep Learning for Stock Price Prediction

Description: Built an LSTM model to predict stock prices using historical data and sequence modeling.

Technologies: Python, PyTorch, Pandas, NumPy, Matplotlib, yFinance, Scikit-learn

Machine Learning for Cryptocurrency Price Prediction

Description: Developed a model to predict cryptocurrency trends using historical data and visualization.

Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, yFinance
